The New Moon

The New Moon is a time of change and new beginnings. Astrologically it's a time to plant the seeds for the results you hope for, even if it's hard to see where it all might lead.

Elias McMillan: The New Moon in Your Chart

This is a particularly ripe couple of days for finding a new partner or turning over a new leaf with an old partner. You may find a flood of emotional intensity coming your way and how you utilize it could largely shape the direction of the relationship. That means be particularly understanding and realize that though feelings may be overstated at this time and emotions run hot, the message underneath is sincere and needs to be taken seriously. Breakthroughs can occur now that you both might have kept a lid on otherwise, and you'll be glad you achieved the new closeness, even though you may not be able to keep it going at that level of intensity all month.

Moon in 7th House

A time when you may feel your style is severely cramped, in particular concerning relationships and your basic worth and self-image. It may be hard to convey yourself and to communicate with others. A lot is happening.

Saturn Square Ascendant

Quick answers, great wit, and a surplus of insights and solutions are at the ready. A good time to write and communicate with real originality. Inventions and breakthroughs are possible.

Mercury Trine Uranus

Not a great day to make plans or decisions. It could be hard to figure out the right move or choice. You may feel frustrated about where you are headed in life just now. Someone older or in authority may disapprove of your actions or decisions.

Sun Square Jupiter

A time when you could make some wrong choices, particularly as they affect your living situation. You might feel cut off from your friends or be unable to make good decisions. A social urge that can turn from good times to hard times quickly.

Moon Square Jupiter

This is a time for discovering others or entering into relationships (friends, lovers, and such) with renewed sense of love and compassion. Real breakthroughs, a willingness to try new, different approaches to relationships.

Uranus Square Midheaven

Your desires are strong, and you will want to enjoy yourself. Romance is very possible. There is a basic drive to appreciate and taste life.

Mars Sextile Venus

Real insight into your own inner workings or psychology could surface today, and in a manageable form. You may be in the mood for deep and penetrating conversations or thoughts.

Sun Trine Pluto

You may be sought after for your advice and counsel regarding personal and emotional issues. You will be able understand and handle this very volatile material. You are able to cut through the red tape and get at what is beneath and behind.

Moon Trine Pluto

You may find yourself analyzing your life situation and surroundings. Conversations of an inspiring kind with younger persons or with those around you may be in order.

Mercury Conjunct Moon

Feeling more inward and wanting to share time with your lover or close friends. Perhaps not a time to be very outward or to try to present yourself to the world. You are feeling reflective rather than expressive just now.
